TECHNOLOGICAL
UNIVERSITY
SINGAPORE

About This Template

- This is an unofficial community template and is not endorsed by NTU.
- Uses NTU Blue as the primary theme color.
- Uses the supplied NTU logo asset in headers and title backgrounds.
- Keeps the presentation system navy-first, with secondary accents in the blue family.
- Designed for XeLaTeX or pdfLaTeX workflows.

Table of Contents

1 Getting Started

► Getting Started

► Brand Colors

► Special Slides

► Summary

NTU Beamer Document

```
\documentclass{beamer}
\usetheme{ntu}

\title{Presentation Title}
\author{Author Name}
\date{\today}

\begin{document}
\maketitle
\begin{frame}{Hello, NTU}
  Slide content goes here.
% close the frame and document as usual
```

Set a title background before `\maketitle`:

Background Commands

```
\titlebackground{assets/background}  
\titlebackground*{assets/background}
```

The starred version clips the image into a split view on the right side of the title slide.

Table of Contents

2 Brand Colors

▶ Getting Started

▶ Brand Colors

▶ Special Slides

▶ Summary

- Select the white or navy slide style in the preamble with `\themecolor{white}` or `\themecolor{main}`.
- Change the footline color before a frame with `\footlinecolor{color}`.
- Useful NTU colors include  `maincolor`,  `ntubrightblue`,  `ntumediumblue`,  `ntulightblue`, and  `ntuteal`.

Standard Block

Standard blocks use the current theme color.

```
\begin{block}{title}  
content...  
\end{block}
```

Color Block

Color blocks let you pick a background color while keeping the same shape.

```
\begin{colorblock}[black]{ntulightblue}{title}  
content...  
\end{colorblock}
```

- Beamer supports overlays for step-by-step explanations.

- Beamer supports overlays for step-by-step explanations.
- Mathematical notation works as usual:

$$\hbar \frac{\partial}{\partial t} \Psi(\mathbf{r}, t) = -\frac{\hbar^2}{2m} \nabla^2 \Psi(\mathbf{r}, t) + V(\mathbf{r}) \Psi(\mathbf{r}, t)$$

- Beamer supports overlays for step-by-step explanations.
- Mathematical notation works as usual:

$$\hbar \frac{\partial}{\partial t} \Psi(\mathbf{r}, t) = -\frac{\hbar^2}{2m} \nabla^2 \Psi(\mathbf{r}, t) + V(\mathbf{r}) \Psi(\mathbf{r}, t)$$

- Use `\alert{...}` to emphasize a **specific point**.

▶ Summary

Chapter Slide

3 Special Slides

- Use chapter slides to separate major sections.
- Optional background images can be split onto the right.

- Use `sidepic` when a visual should fill the right side.
- The content area remains on the left.
